

Smart Aligner FX

Antenna Alignment System

WA20-7500

Fast Alignment For Telecom Antennas

Engineered for simplicity, the WA20-7500 features a lightweight design with a rugged construction for rapid azimuth finding. The full system includes the tool, universal mounting bracket and carrying case, plus chargers.

Features

- Reduced weight vs competitive products - total tool weight of 2.2 lbs
- Intuitive design for simplified antenna alignment
- Easy-to-use interface and mobile application for site reporting
- IP-65 rated for rugged deployment in all conditions
- Precise azimuth and tilt & roll readings
- Free Smart Aligner mobile app (iOS & Android) for building reports, including pictures
- Field calibration routine - date of calibration on report

Available as a system or as individual components:
