

RELEASE 4

CHIMERA

5-speed 2-port network impairment emulator

Chimera can emulate network impairment at five Ethernet speeds: 100GE, 50GE, 40GE, 25GE and 10GE. This unique flexibility is provided via two physical transceiver cages, both supporting QSFP28 and QSFP+ transceivers.

The result is a versatile solution that provides consistent, accurate, well-defined and repeatable impairments to traffic between DUTs in the lab. Chimera is ideal for benchmarking, stress/negative, "what-if" and regression testing of network infrastructure and Ethernet equipment capable of supporting 100GE such as switches, routers, NICs and fronthaul/ backhaul platforms.

Chimera is easily controlled using ValkyrieCLI scripting, making automation of tests simple using the Python library supplied by Xena.

TOP FEATURES

- Industry's only fully integrated traffic generation & impairment solution (Valkyrie & Chimera)
- Multi-speed impairment 10/25/40/50 & 100GE – in a compact 1U chassis or as a ValkyrieBay test module
- High port density
- Flexible port reservation
- Ease of use
- Free software (incl. ValkyrieManager and ValkyrieCLI scripting)
- Free tech support & training for product lifetime

Chimera is available as standalone ChimeraCompact and as a 2-slot test module for the ValkyrieBay (only Val-C12-2400G)

PRODUCT NUMBERS (P/N)

ChimeraCompact: C-Chi-100G-5S-2P Test module: Chi-100G-5S-2P

SYSTEM OVERVIEW		
Interface category	QSFP28 • 100G, 50G, 40G [*] , 25GE and 10G [*] Ethernet QSFP+ • 40G, 10G Ethernet * Depending on transceiver capabilities	
Total number of test ports (software configurable)	2x100G, 4x50G, 2x40G, 8x25G, and 8x10G Ethernet	
Interface options	Each cage • 1 x 100GBASE-SR4/LR4/CR4, or • 2 x 50GBASE-SR2/LR2/CR2, or • 1 x 40GBASE-SR4/LR4/CR4, or • 4 x 25GBASE-SR/LR/CR, or • 4 x 10GBASE-SR/LR/CR Actual interface options depend on the capabilities of the inserted t Both cages must run with the same base interface configuration (e. ** As defined by 25/50 Gigabit Ethernet Consortium	802.3bj standard Consortium ^{**} 802.3ba 802.3by/Consortium ^{**} 802.3ae ransceiver. g. 2 x 50G).
Forward Error Correction (FEC)	RS-FEC (Reed Solomon) FEC, IEEE 802.3 Clause 91 (100GE) RS-FEC (Reed Solomon) FEC, IEEE 802.3 Clause 108 (25GE) RS-FEC (Reed Solomon) FEC, 25G Ethernet Consortium (25GE)	
Number of transceiver module cages	2 x QSFP28/QSFP+	
Port statistics	Link state, FCS errors, frame and byte counters	
SyncE	Lock Tx clock to recovered Rx clock from any input port (Single clock	c domain)
Field upgradeable	System is fully field upgradeable to product releases (FPGA images and software)	
Tx disable	Enable/disable of optical laser	
Oscillator characteristics	 Initial Accuracy is 3 ppm Frequency drift over 1st year: +/- 3 ppm (over 15 years: +/- 15 ppn Temperature Stability: +/- 20 ppm (Total Stability is +/- 35 ppm) 	n)

RELEASE 4

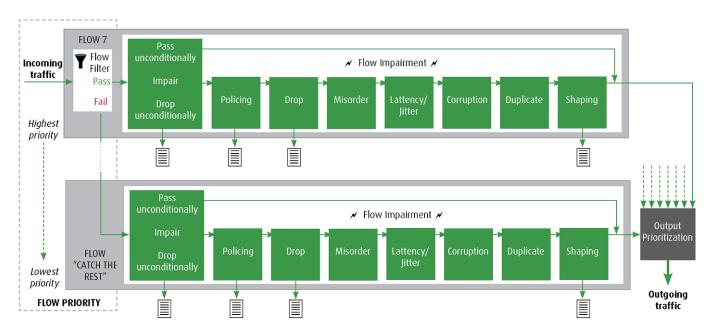

100/50/40/25GE FRAMED PRBS AND PCS LAYERS

Link Flap	Programmable single short or repeatable link down events with ms precision
Error Injection (PMA Layer)	Manual single shot bit-errors or bursts, automatic continuous error injection with ms precision
Supported frame sizes	Ethernet packets from 56 to 12288 bytes

FLOWS	
Number of flows per port	8 (incl. default flow)
Flow filter definition	MAC Source and Destination Address VLAN Tag (C-Tag and S-Tag) MPLS Label IPv4 Source and Destination Address IPv4 DSCP/TOS IPv6 Source and Destination Address UDP/TCP port numbers Up to 6 consecutive bytes in the packet Xena Test Payload ID (TID)
Flow statistics	Chimera implements impairment counters per flow, including dropped, corrupted, mis-ordered and duplicated packets.
Libraries	Libraries of own impairments

IMPAIRMENT PER FLOW	
General	Impairments can be changed dynamically
Packet Manipulation	Packet drop up to 100%. Step size: 0.0001%. Duplication Mis-ordering Protocol Corruption (Ethernet Frame FCS, IP/UDP/TCP header Check Sum error) Custom Payload Corruption (with correct Ethernet FCS)
Latency / Jitter	Constant latency - Max. latency lossless 160ms (100GE wire-speed) Step-size 100 ns, accuracy: +/- 50 ns - Max. latency reduced bandwidth 1.6 s (10 s) - Min. (Intrinsic) delay: 7.0 µs for 10G/40G/50G/100G 7.2 us for 25G 13.0 us for 10G Accumulate & Burst Step (2 alternating delays) Jitter (Distributions - see below)
Flexible Distributions	Impairments and jitter (Duplication, Drop, Corruption and latency) can be applied with flexible distributions incl. Random, Periodic, Gilbert-Elliot, Gaussian, Gamma and Uniform. Users can also specify custom distributions for impairments.
Bandwidth Control (L1 / L2)	Policing - Step size: 100 kbps Shaping - Step size: 100 kbps

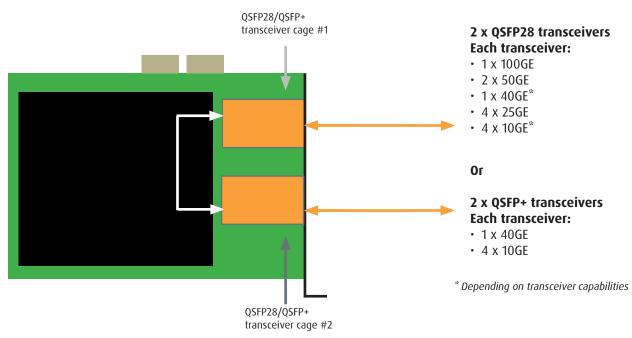

How Chimera processes incoming traffic:

One module - multiple options

Chimera has 2 transceiver cages. The type of transceiver used determines the speeds and number of ports available. The port number / speed configuration must be the same for both cages and this is defined using ValkyrieManager, Xena's traffic generation and analysis software.

SPECIFICATIONS

Dimensions

- 1U ChimeraCompact 19" (48.26 cm) 1.75" (4.45 cm) 9.8" (25 cm) • W:
- H: • D:
- Weight: 10 lbs (4.5 kg)

Max. Noise

• ChimeraCompact: 49 dBa • ValkyrieBay: 58.5 dBa

Environmental

• Operating Temperature: 10 to 35° C

- Storage Temperature: -40 to 70° C
- Humidity: 8% to 90% non-
- condensing

Regulatory

• FCC (US), CE (Europe)
